

Place the pictures for felt board activity in this way:

- Print on sturdy paper if possible, and laminate.
- Attach velcro in several places to the back of each picture.

Cut out the roots to the plant at the bottom.

Ask someone to put the plant on the board and as you talk about what plants need to grow, add the sun and the rain cloud and add the roots to show the plant growing or use the plant with the roots as your demo plant.

You can use the water can to show indoor gardening.
